

Feranmi Oresajo

Mobile & Web Developer — Flutter | Next.js (TypeScript)

Lagos, Nigeria • feranmioresajo@gmail.com • 09072182889

github.com/Ferousco-dev • linkedin.com/in/oluwaferanmi-oresajo

SUMMARY

Flutter and Next.js developer who builds mobile apps and websites. Recently built Tappay, an NFC payment wallet that won the 2026 hackathon at Redeemer's University. Currently studying Software Engineering at OAU.

TECHNICAL SKILLS

Mobile: Flutter, Dart, NFC, Firebase, payment APIs (Payaza, Paystack)

Web: TypeScript, Next.js, React, JavaScript, HTML5, CSS3, Bootstrap

Backend & Tools: PHP, MySQL, REST APIs, Python, Git & GitHub

PROJECTS

Tappay — NFC Payment Wallet | Flutter · Hackathon Winner (2026)

- A mobile wallet that lets users pay by tapping their phone instead of using cash or a card.
- Integrated the Payaza API to process payments and keep a record of transactions.
- Won first place at the 2026 hackathon hosted by Redeemer's University, Ede.

Tech Stack: *Flutter, Dart, NFC, Payaza*

Forge — Job Marketplace for Informal Workers

- A platform that helps informal and gig workers find jobs close to them.
- Built location-based search so workers see the openings nearest to where they are.
- Set up separate flows for people posting jobs and people looking for work.

Tech Stack: *Flutter, Next.js, TypeScript, REST APIs*

AnonPro — Anonymous Social Platform | 2025 – Present

- A social app where people can post, comment, and message each other anonymously.
- Built anonymous posts, private chat, stories, and media uploads, with media stored on Cloudinary.
- Wrote the backend APIs and built the frontend to match.

Tech Stack: *PHP, JavaScript, MySQL, Bootstrap, Cloudinary*

Offline File Transfer — Share Without Internet | 2025

- Lets two devices send files to each other directly, with no internet or mobile data.
- Moves files over a local hotspot using a laptop as the host server.
- Handles large files like videos and documents across the local network.

Tech Stack: *Flutter, PHP, XAMPP, Local networking*

Connect — Campus WiFi App | 2026

- A campus app for buying WiFi access, with a built-in student wallet.
- Built the wallet and the ticket-purchase flow, with payments handled through Paystack.
- Added 2-step verification and auto-logout to keep accounts secure.

Tech Stack: *Flutter, Firebase, Paystack*
